

Muhammad Ferdiannoor NPM. 11.21.0086. The Correlation Between Students' Anxiety And Their Speaking Performance At The Tenth Grade Of SMAN 1 Pelaihari School Year 2015/2016. English Department, Faculty of Teachers' Training and Education, Islamic University of Kalimantan, Muhammad Arsyad Al-Banjari. Advisers: (1) Raudhatul Haura, M.MPd., M.Pd. (2) Angga Taufan Dayu, M.Pd.BI.

Keywords: Anxiety, Speaking

Anxiety is a feeling where the people uncertain or hesitant with their ability or what they want to do. Speaking is the way to communication from the speaker to the listener. Someone who speaks they should be able to express their feeling to get the target language/communication. The objectives of the research is to investigate the correlation between student's anxiety and their speaking ability. The research was conducted at SMAN 1 Pelaihari. The researcher took the Tenth grade students in academic year 2015/2016 as subject. The researcher used Quantitative research in correlation study because the data in number or ordinal. To analyze the data, the researcher use statistical analysis. The table showed the correlation coefficient equaled  $r=139$ , which indicated there was positive correlation between two variables. The conclusion of analyzing the data significance 0.558 the data hypothesis testing explained that  $N.Sig > 5\%$  and for the result, the Null hypothesis in this research cannot be rejected. It showed that both students' anxiety and their speaking ability were not correlated.
